Webinar Archives

- This webinar is being recorded
- You will be able to access the archive of this and other webinars at www.gatfl.org

Credits

- **CEUs** are approved for .15 clock hours and are administered through Georgia Tech Professional Education
- **CRCs** are approved for 1.5 clock hours through the Commission on Rehabilitation Counselor Certification
- To receive your verification form, send an e-mail with the webinar title and date, your full name, organization, city, state, e-mail address and date of birth to Liz.Persaud@gatfl.gatech.edu

Webinar Evaluation

At the end of today's webinar, we ask that you please take a moment to complete our survey:

<https://www.research.net/s/TFLwebinar>

We Want to Hear from You!

We are actively working on the 2014 webinar schedule and we would like to know what topics you are interested in.

Please email your suggestions to:

Liz - liz.persaud@gatfl.gatech.edu

Hope begins in the dark, the stubborn hope that if you just show up and try to do the right thing, the dawn will come.

~Anne Lamott

Tools for Life Mission

We're here to help Georgians with disabilities gain access to and acquisition of assistive technology devices and assistive technology services so they can live, learn, work, and play independently in the communities of their choice.

Welcome to Tools for Life

Tools for Life, Georgia's Assistive Technology Act Program, is dedicated to increasing access to and acquisition of assistive technology (AT) devices and services for Georgians of all ages and disabilities so they can live, learn, work and play independently and with greater freedom in communities of their choice.

Tools for Life and the TFL Network work collaboratively together to accomplish our mission through:

- [AT Demonstration](#)
- [AT Evaluations and Assessments](#)
- [AT Funding Options & Education](#)
- [Access to the TFL AT Lending Libraries](#)
- [AT & Durable Medical Equipment Reuse](#)
- [AT Training \(Individual\)](#)
- [AT Training \(Groups\)](#)

Please take our survey to help us gather information that will help better serve the community. The survey can be found at:

TOOLS FOR LIFE APPFINDER

AT Services

AT Device Loans:

The Tools for Life Network has thousands of AT solutions for individuals to “Try before you buy” for a short-term loan to ensure the AT solution meets your needs.

Individual Trainings:

Tools for Life provides training to individuals wanting to know more about specific assistive technology solutions, AT funding options and other related topics.

Group Trainings:

Tools for Life provides training to groups and organizations wanting to know more about disabilities, assistive technology and other related topics.

AT Assessments:

An assistive technology assessment is an in depth evaluation that is focused on matching your abilities with technology that will allow you to perform specific task or goal.

AT Services

Website Assessments:

Tools for Life offers web accessibility evaluations for websites and software applications. We provide suggestions on how to make accessible content for the widest range of users with various disabilities.

Workstation Assessments:

Tools for Life's Workstation Assessment is designed to assist those who may be experiencing physical discomfort due to the current set-up of their personal workstation.

E-Text:

Electronic text (e-text) is an accommodation provided to individuals who have difficulty with printed text. AMAC coordinates and converts printed material needed (such as textbooks, articles, or notes) into an electronic format so that the material can be accessed on the computer.

Try AT

Visit an Assistive Technology Resource Center (ATRC) to learn more about assistive technology devices and to try before you buy!

AT Device Demonstrations:

During an assistive technology demonstration, you will learn more about general and specific features of AT solutions to see if they support your needs and assist you in performing specific tasks or goals.

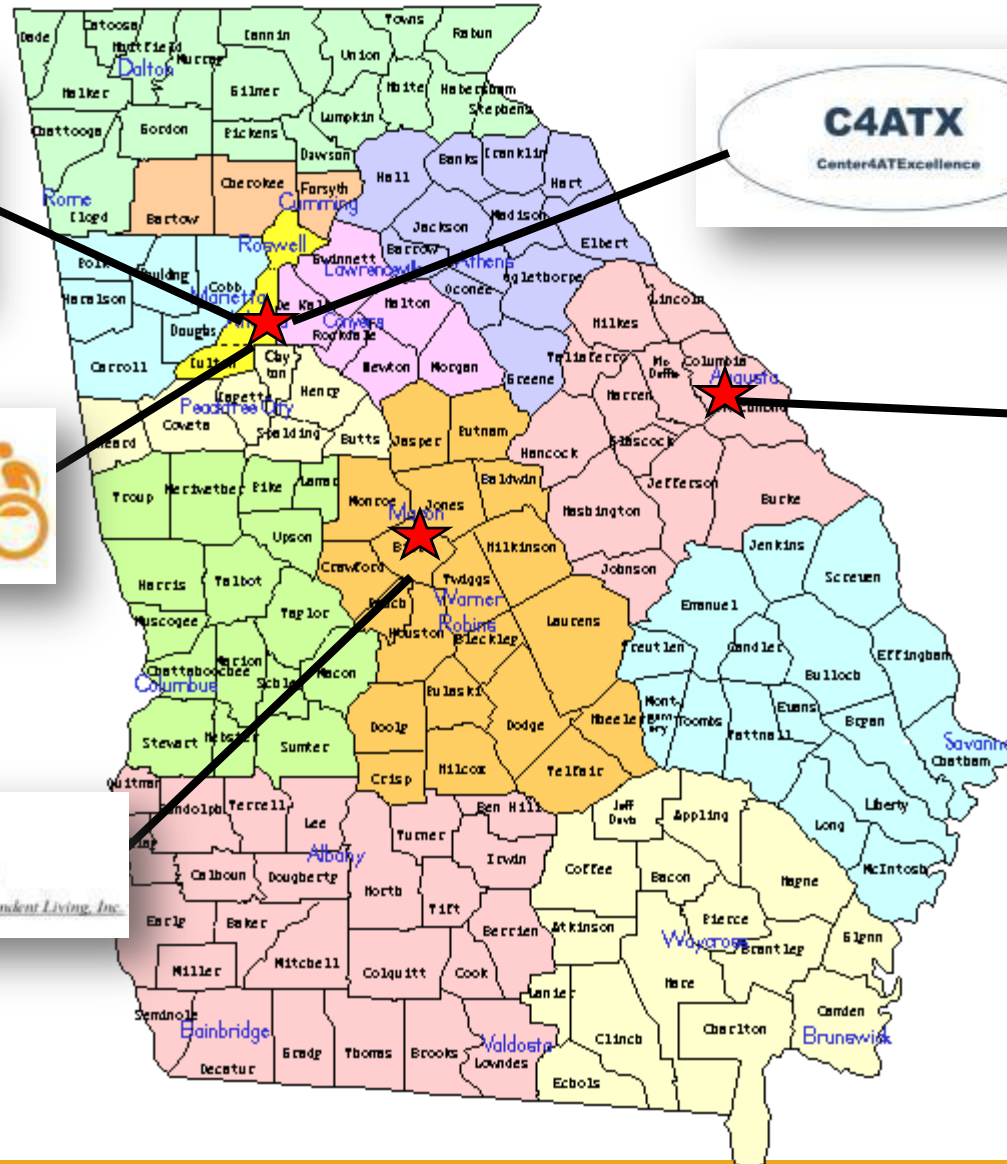

Individual and Group AT Trainings:

The Tools for Life Assistive Technology Resource Centers (ATRC) provide training to individuals, groups and organizations wanting to know more about disabilities, assistive technology and other related topics.

AT Device Loans:

The Tools for Life AT Lending Library has thousands of AT solutions for individuals to “Try before you buy” as a short-term loan to ensure the AT solution meets your needs.

Tools for Life Network

Making the Connection

Who are We Serving

- Over 54,000,000 individuals in the United States have disabilities that affect their ability to:
 - see
 - hear
 - communicate
 - reason
 - walk
 - perform other basic life functions

Guiding Principle

- DisAbility is a natural part of the human experience and in no way diminishes the right of individuals to:
 - (A) live independently;
 - (B) enjoy self-determination and make choices;
 - (C) benefit from an education;
 - (D) pursue meaningful careers; and
 - (E) enjoy full inclusion and integration in the economic, political, social, cultural, and educational mainstream of society in the United States.

Why Assistive Technology?

- For a person without a disability, technology makes things easier....
- For a person with a disability, technology makes things possible.

Staying off the FAST Track!

- ✓ **Frustration**
- ✓ **Anxiety**
- ✓ **Stress**
- ✓ **Tension**

Multidisciplinary Evaluation

HATT/SETT Framework

- Identify **human/student** needs
- Determine **activity/environmental** demands and resources
- Define the **tasks** that the student must perform
- Recommend **tools**, technology, or techniques that will address needs

SETT – Joy Zabala & QIAT
HATT – Cook & Hussey

Effective AT Assessment

- Uses a feature-match approach
- Incorporates on-going educational/life planning
- Hanging out with Intent
- Targets natural environments
- Utilizes the competencies of multiple team member
- Demands meaningful follow-through

Assistive Technology Matching: A Team Approach

- ✓ The Person with the disAbility
- ✓ Circle of Support – Family of Choice
- ✓ Case Managers
- ✓ Technologist
- ✓ Occupational Therapist
- ✓ Speech & Language Pathologist
- ✓ Physical Therapist
- ✓ Engineer

Identifying Strategies to Keep Older Adults Healthy in Senior Living Communities

Contact Person: [Sara McBride](#)

Many older adults choose to make the transition into senior living

communities, such as independent living or assisted living. We are interested in understanding the types of strategies used and decisions made by staff in these types of communities that are aimed at supporting residents' health. By identifying these processes, we may be able to improve training or design decision support systems that could facilitate portions of the decision making process.

Presentation 2: Human-Robot Interaction: The Potential to Support Successful Aging

Philips iCat

There is much potential for robots to support older adults in their goal of independent aging. However, for human-robot interactions to be successful, the robots must be designed with user needs in mind.

In the Human Factors and Aging Laboratory, Roger's lab is conducting research in the nascent field of older adult-robot interactions. In this presentation, Rogers

will provide an overview of the needs, capabilities, preferences, and limitations of older adults. She will then discuss our current and planned research on the design of robots to support older adults and health care providers. Our focus is on understanding the interactions among user characteristics, robot characteristics, and the context of the interactions (e.g., task demands).

GATSBII-Georgia Tech Service Bot with Interactive Intelligence

Presentation 3: Aware Home Technology to Support Aging-in-Place

Imagine if your home were “aware” of your activities so that it might help you remember what it was you went into the kitchen for or whether the visitor at the front door is someone you know or even what the proper procedure is for performing a recently learned home medical procedure. An aware home is not from the world of science fiction—it is within the realm of science. Such technological developments have the potential to enable older adults to maintain their functional independence and to “age-in-place.” They also have the potential to support families caring for children with developmental disabilities or individuals recovering from illness or injury. An innovative research program at Georgia Institute of Technology is focused on developing psychological and computer science to support home activities.

Aware Home at Georgia Tech

The presentation will include examples of health care technology, communication technology, and memory supports. These examples demonstrate the complexity of the issues involved in designing the computationally capable home of the future and provide direction for future research and development efforts.

VGo Telepresence Robot

- Enables a person to replicate themselves in a distant location and have the freedom to move around as if they were physically there
- Reduces travel costs

Products and Services

VGo is an all-in-one solution that includes everything you need to establish your physical presence in a distant location.

With the VGo solution, an individual's presence is replicated in a distant location such that they can interact and perform their job in ways not previously possible. Now they can see, be seen, hear, be heard and move around in any remote facility – just as if they were there. VGo will enable businesses to increase productivity of remote and travelling employees, healthcare providers to deliver lower cost services and improved quality of care, and homebound students to attend school – all with a great user experience and at an affordable price.

CASE STUDY

Product Testing Network: Georgia Tech Launches HomeLab to Help Companies Evaluate In-Home Use of Emerging Health Technologies

Baby boomers have witnessed many technological innovations, and they expect technology to provide them with solutions to help maintain their independence for as long as possible. They are outfitting their homes with products to help them live healthy lifestyles, manage chronic conditions, remember to take medications and remain connected with their caregivers.

To help companies evaluate baby boomers' perceptions, use and acceptance of home health and wellness technologies, the Georgia Institute of Technology has launched HomeLab. HomeLab is a statewide network of adults 50 years of age and older recruited to evaluate the in-home usability and effectiveness of consumer products designed for the aging adult population.

HomeLab currently consists of 100 homes distributed throughout the state of Georgia; the network is expected to grow to 150 homes later this year and 550 homes by 2014.

Technology Trends
that you've noticed?**

Exploring Assistive Technology

Your AT Solutions!

Power Fish'n and Trigger Finger

- Electronic power assist fishing reel
- Attaches to a fishing pole
- One finger push
- Straightens out trigger finger so that an individual can shoot

DXT Fingertip Vertical Wireless Mouse

- Ergonomic Relaxed Neutral Wrist and Hand Position
- Precision Grip for Accurate Navigation
 - Small muscles and joints of the fingers have higher processing abilities
- Instantly Switches Between Right and Left Hand
- [Video](#)

Video Screen Microscope

- Digital Microscope that captures videos and pictures
- Internal Memory and SD Card Slot
- LED Lighting
- 3.5 inch color screen

LED Handheld Magnifier

- Handheld
- LED light provides natural bright lights
- Easy storage
- Reading
- Sewing

Magnifiers

-

Interpretype

- Allows individuals who are deaf and/or hard of hearing to communicate with a hearing individual by text
- Can connect a braille display with bluetooth
- Can save conversations

Keyboards

LOMAK

Light Operated Mouse and Keyboard

- Hand or head pointer controls a beam of light that enters, then confirms, function
- Confirmation of keys reduces errors and increases the speed of operation
- Keyboard can be operated with small movements and does not require a lot of energy
- www.lomak.co.nz

Logitech Wireless Touch Keyboard

- Wireless control
- Low-profile keys
- Range of up to 33 ft
- 3.5 inch multi-touch/gesture touchpad

Eyegaze Edge

- Eyegaze System
- Control computer and tablet using your eye
- Environmental Controls
- Communication

Roomba

- Robot vacuum cleaner
- Cleans hardwoods and carpet
- Set Schedule
- Home base for charging
- Built in sensors to avoid stairs
- Great for those who can not use a handheld vacuum

Automatic Feeder

- Mealtime Partner
- Different mounts
- Battery operated
- Bowl tops controls amount of food
- Control Pause time between spoonful
- Adjustability of the spoon

Picture of the Mealttime Partners Mounted on the Support Arm

Individuals who have limited range of upper body control or who fatigue easily from the effort of controlling their body movement should use *the Partner* mounted on the Support Arm. The Support Arm allows *the Partner* to be positioned so that the spoon, when extended out from the device, is positioned very close to the user's bottom lip. With *the Partner* positioned this way, the user only has to lean forward slightly to take food off of the spoon, thus the user exerts very little effort.

Switch Access

Access - Joystick

Tongue Drive System

- Wireless device that enables people with high-level spinal cord injuries to operate a computer and maneuver an electrically powered wheelchair simply by moving their tongues
- dental retainer embedded with sensors
- detect movement of a tiny magnet attached to the tongue
- Testing with iPods and iPhones

- *GA Tech*
- *Shepherd Center and Rehab Institute of Chicago*

What are Your Technology Trends?

What Technology you want to see more of?

Android & Apple

Which One???

LET'S TAKE A LOOK AT SOME OPTIONS

Microsoft Surface

- Windows 8
- Slim and has a USB port
- Moveable Tiles
- Built-in Accessibility
 - Speech-to-text
 - Narrator
- Thin pressure sensitive cover that doubles as a keyboard
- Starts at \$349

Samsung Galaxy Tab 3

- Android System
- 7, 8, or 10 in screen
- Camera
- Micro card
- Wi-Fi
- USB for computer
- Some built-in accessibility app
 - Download others
- Starts at \$199.99

Nook HD

- eBook Reader and mobile tablet
- No Camera
- Access to shop both Google Play Store and Barnes and Noble
- Purchase apps
- Starts at \$129

Kindle Fire HD

- eBook Reader and mobile tablet
- Front facing camera
- Access to Amazon apps
- Free cloud storage for Amazon purchases
- Purchase Apps
- 7inch or 8.9 inch screen
- Starts at \$199.99

Apple iPad/ mini iPad

- Multi- touch screen
- New iOS 6
- Millions of apps
- Surf web
- iTunes
- Videos
- Organization
- Accessibility
- Books
- Photos
- Speakers
- New iPad had 5.0 megapixel camera
- Starts at \$499/\$399 and mini \$329

Apple iPod Touch

- 5 Megapixel Camera
- Millions of apps
- Videos
- Surf Web
- Voice Over
- Organization
- Speakers
- Bluetooth
- New iOS 6
- Starts at \$299 / \$199 4th gen

Refurbished Tablets

- If you do not need the latest and greatest consider an older models for a discount
- Want to make sure that refurbish tablets have been certified
- Look for at least 1 year warranty
- Many places now sell
 - Apple
 - BestBuy
 - Amazon

Dragon Dictation

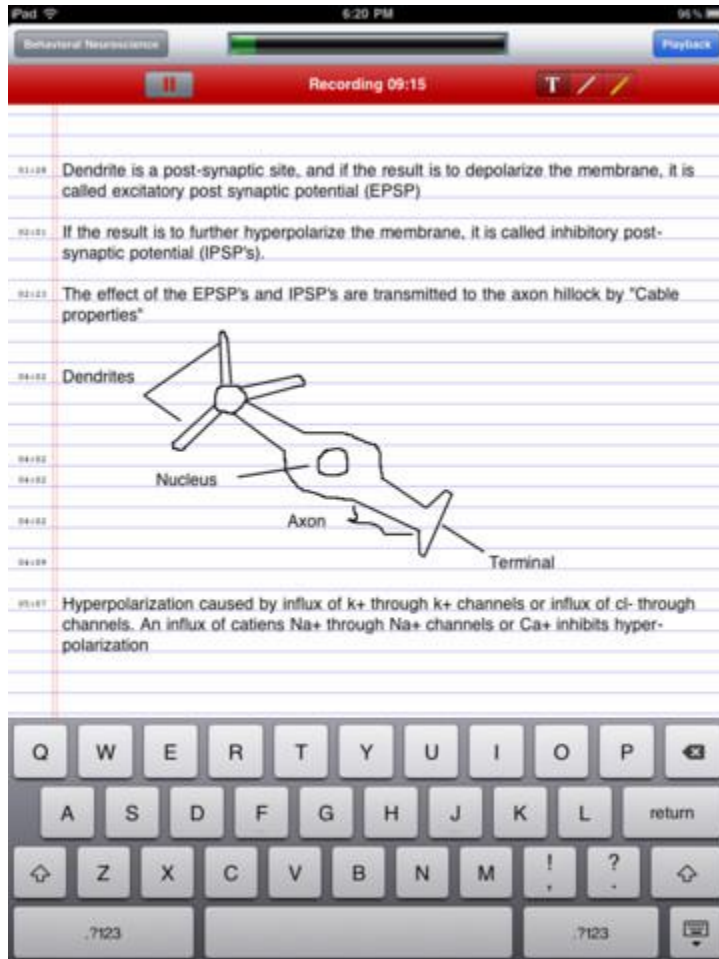

Hi John call me when you get this e-mail. I'm running a little bit late.

- Voice Recognition
- Free
- Dictate notes, emails, Twitter, and Facebook
- Supports many languages
- Cut, Copy, Paste
- Android
 - Dragon Go!
 - Dragon Hands Free Assistant

AudioNote

- Records your notes, meetings or lectures
- Can take notes by typing, stylus, or drawing
- Time stamps so you can go directly to where you want to hear
- Highlights notes when read back
- \$4.99

FBReader TTS+ Plugin

- Free
- eBook Reader
- Text-To-Speech plugin for FBReader for Android
- Can highlight whole sentences or paragraphs
- Change settings for voice and download voices

Perfect OCR

- \$3.99
 - Uses the built in camera to scan documents
- Edit, copy, store, email documents
- Upload to online storage is as Evernote
- Does take practice for picture

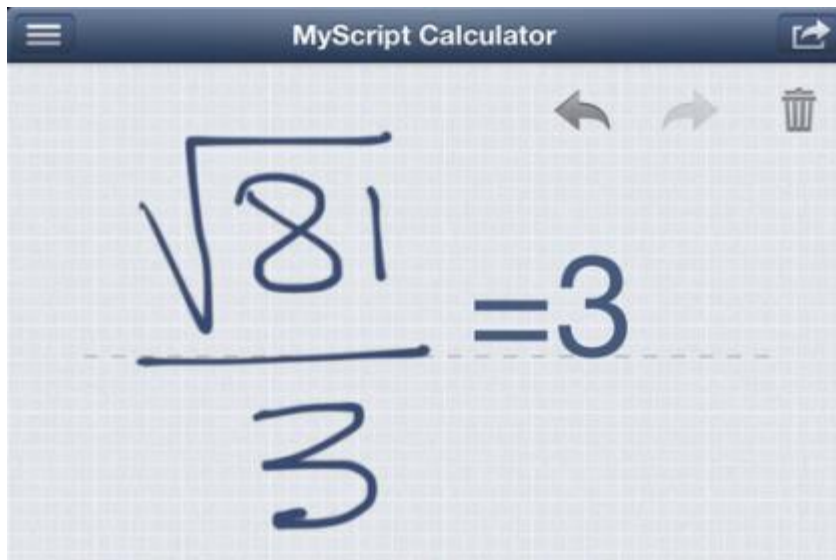

iHomework

- Keep up-to-date with your school work, grades, to-do's, teacher's information
- School organizer that can be with you anywhere you go, whether that be on your iPhone/iPod touch, iPad, or Mac

MyScript Calculator

- Use your handwriting to write any arithmetic formula
- Write and calculate mathematical expressions in with no keyboard
- Scratch-out gestures to easily delete symbols and numbers
- Portrait and landscape operation
- Redo and undo functions

BrailleTouch

- Prototype app for touchscreen mobile devices
- FREE Open Source app
- 32 words per minute with 92% accuracy with the prototype app for the iPhone
- Use of the six-key configuration so that the keyboard fits on the screen and users keep their fingers in a relatively fixed position while texting
- GA Tech Researchers
- Type with screen facing away
- Braille like typing

iZen Garden

- Choose from 100s of objects, plants and creatures to place in your garden
- Rake the sand and share your creations
- Helps you to center your mind, relax your psyche and relieve your stress

Breathe2Relax

- Portable stress management tool
- Detailed information on the effects of stress on the body
- Instructions and practice exercises to learn the stress management skill called diaphragmatic breathing
