

## MATERIALS LIST

- Plastic Hanger
- InstaMorph
- Tape Measure
- Saw or Cutting Tool

Scan to access instructions, as well as more information about CIDI and Tools for Life at ATIA 2022!

## STEP 1

Measure from the hook of a hanger 3 inches on both sides.

## STEP 2

Cut off the hanger at the 3 inch mark on each side with a cutting tool, I used a saw.

## STEP 3

Place InstaMorph pellets in 150 degree water.

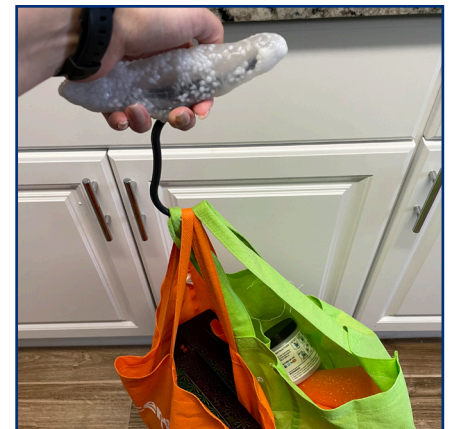

## STEP 4

Set timer for 2 minutes to allow InstaMorph to become moldable.

## STEP 5

Make a grip around the hanger, opposite from the hook side.

## STEP 6

Place the grip in water if you need to mold the InstaMorph more.
