Why Is Note-taking Important?

Since the 1970s, scholarly research has confirmed time and again that note taking, whether over reading or lecture, on average improves student performance.

Why Is Note-taking Important?

Students benefit from the act of creating their own study materials. As some researchers have found, “Individuals retain materials that they have generated better than materials that have been generated by others and given to them.” Students who perform the best on targeted material tend to be those who created their own study outlines, study questions, and study questions with answers.

NoteTaking Skills and Strategies

If the teacher writes something on the board or overhead or repeats an idea then it is usually a key point and should be written down.

Try to use a three-ring binder, it allows for more flexibility in rearranging your notes and any handouts that you may receive.
Selecting Apps

• Consideration of student’s
  – needs
  – abilities
  – tasks
  – environments

• Features of the apps considered
Apps That Can be Used to Take Notes
NoteTaking Skills and Strategies

Try to sit towards the front and center of the class where you'll be less distracted and can hear the teacher the best and have a good angle on any visual aids that may be shown.

Don't rely on someone else's notes, you may not understand everything that they write down and you'll learn the best by taking your own notes.

What's New in Version 2.5.6

• Voice Reminders! [NOTE: If you'd like to backup your recordings before updating (just to play it safe) but aren't sure how to simply drop us a note and we'll reply with instructions.]
QuickVoice Recorder

• Very basic recording app
• Email up to 5MB
• Pause/resume feature in recording allows to start/stop recording without creating a new clip
• Records for seconds or hours
• Auto file naming with optional renaming
• Adjustable recording qualities
• Use devices’ built-in or add-on mics
NoteTaking Skills and Strategies

If your teacher talks fast, it may help to bring an audio recorder and record the lecture while taking notes. After the lecture is over you can replay the lecture and fill in any parts that you missed in your notes. You will need to be sure that you have permission from the teacher to record his/her lecture.

Cell membrane: The thin layer of lipid and protein that separates cell's contents from the environment.

Nucleus: Control center of the cell

Important - Ask teacher about centrioles
NoteTaking Skills and Strategies

Do reading assignments or homework questions before class, it is easier to take notes when you know what the teacher is talking about.

Date your notes and number the pages. Add titles and subtitles when you move onto a new topic for easy referencing. Also, write on one side of the paper so that it will be easier to set them out side-by-side for easier reviewing.
NoteTaking Skills and Strategies

Write down any terminology along with the definition that the teacher may present.

Make sure that you write legibly, if you can't read your notes later, they'll be useless. If you have sloppy handwriting it may be wise to type your notes so that they are easier to read.

Ipad 2 - I hated Dragon D a couple years ago ★★★★★

This was an app I was anxious to use when I first bought my iPad.

It doesn’t work ★★★★
by Unhappy1155 – Mar 6, 2013
It will miss a lot of your words, yes. But that’s not the worst part. Worst problems are:
Dragon Dictation

- Speech-to-Text
- Requires internet connection for the speech recognition
- Able to correct words that are not transcribed properly
- Copy and paste dictated notes into documents that have paste feature
- Notes are collected individually by the first part of the dictation (can’t name by files)
- Tap to cut off recording or customize to detect when speaking has stopped and stop recording
We are learning about Phil parts and their functions. The nucleus is a large oval body near the center of the cell. It is the control center for all activity. The nucleus is surrounded by a nuclear membrane. The new Clio plasm is the Protopic some in the nucleus. It contains genetic material called chromosomes. The cell membrane is the outer boundary of the cell. It separates the sale from other sale.

Phil = cell
new Clio plasm = nucleoplasm
Protopic some = protoplasm
Sale = cell

Bring highlighters to class. Teachers will frequently make comments like, “This is an important concept.” Or, “Make sure you understand this.” These are direct clues that this will more than likely be on an exam. Highlighting these notes will help remind you later that this is definitely something you need to know.

Don't rely on someone else's notes, you may not understand everything that they write down and you'll learn the best by taking your own notes.

Review notes after class to make sure they're accurate and complete. Doing this just before starting homework in a particular subject can help a student focus on the topic at hand.

Find: The center of gravity of this assembly.

Baker Beach Hike

Start at the top of the beach (look for the Coastal Trail sign pictured here) for the totally unexpected “reverse bridge” view of the Golden Gate.

Then take the Sand Ladder steps to scenic Baker Beach.

Take your time, and remember to:

- Feel how cold the Pacific Ocean is.
- Enjoy the view of the Golden Gate Bridge.
- Turn around and see the amazing views of the homes on the hills opposite the bridge.
- Make sure to ask the fishermen what they are catching.
- Leave some time to relax and people watch.

Basic Float Guidelines

- IS = knot with white cap (water)
- To fix protruding apple back pasture (float off)
- Get off the water over rough water
- Tow on rough water
- Never give up rough water

Sailing

- Rudder (off)
- No power
- Elevator down (control forward)
- Control opposite rudder

Plan a route

- Transition to take off
- High nose up - high power setting
- Plan for smooth landing

Analyzing Lang development of physically impaired kids using AAC

Handout posted @ program planner

CWUAAC- children who use AAC, assessment of expressive Lang - very important part of development of AAC systems, measuring progress on goals, obtaining services, funding, justification for continuation of services

What priced typically used - formal - norm based - prefer informal Lang sampling ore real world especially for severely involved kids

Informal procedures - spontaneous

Language sample - check handout

Collecting - recommended length of sample 50-100 utterances

Analyzing - SALT mlu words/morphemes. - types do words used , morphological endings, get mlu,vocab, grammar, Damico's analysis - quantity, qualitym

Quad profile

How do wee apply these methods to AAC?

Discussed research in Lang develop in AAC users change to intervention

Factors affecting Lang develop
- vocabulary, not self chosen, done by adults,
- vocab not sufficient to develop Lang
- do they have morphological variations
- visual representation has to be learned
- how is vocal organized?

- communications partners, too many questions too few opportunities, fail to recognize comm attempts
- computerized tools - LAM, PeRT (performance report tool) get info on pragmatism, semantics, syntax, morphology, Lang representations methods rate of comm, minutes of comm, fluency of comm

Case study - uses LAM, also need face to face to verify, collect at least 50 utterances, one more

What are the rules of sample analysis - analyze for MLU, need to recalculate on pre stored sentences/phrases/words (open - verbs, nouns, adj - & closed - no morphological variations - class) how does that alter calculation of MLU.? Generous rules - count as if verbal, give extra credit for morphological meta linguistic skills most kids not aware of i.e., eat, eats, eating,ate, eaten, to. Strict rules - count pre stored As 1 morpheme, pre stored compound words as 1 morpheme unless stored as individual words (week end). Moderate rules - follow normal rule as close as possible with exception of pre stored , count pre stored phrases and coping words with normal rule, open class words - count bound morphemes ass normal

Whatever use be consistent

Tracey Kodak - continuation of language learning profile

The Flower:
The flower is the reproductive unit of some plants (angiosperms). Parts of the flower include petals, sepals, one or more carpels (the female reproductive organs), and stamens (the male reproductive organs).
NoteTaking Skills and Strategies

The most effective note-taking is active not passive. Active learning helps you to make meaning from what you learn: passive learning is allowing yourself to be an empty vessel into which knowledge is poured with no way of organizing or making meaning from it. You are less likely to remember things you learn passively.
NoteTaking Skills and Strategies

The main aim of note-taking is to record and remember. Good note-taking involves analyzing and organizing the information to build a better understanding of the subject, and therefore aiding recall.
