Considerations in Multimedia Accessibility

Session presented by:
Carolyn Phillips, John Rempel & Patrick Fraser
AMAC Accessibility Solutions and Research Center
College of Architecture
Georgia Institute of Technology

www.amacusg.org
A high-level look at tools and tips to help make audio and video more accessible. Includes some discussion about captioning techniques, such as re-voicing.
Carolyn P. Phillips is nationally recognized in the field of assistive technology and disabilities. Carolyn serves as Director and Principal Investigator of Tools for Life, Georgia’s Assistive Technology (AT) Act Program at Georgia Tech | AMAC.
John Rempel
Quality Control & Training Specialist

John has 17 years of experience working with people with disabilities. As a Quality Control and Training Specialist with AMAC, John assesses individuals' needs, develops training materials and web audits for its members, and provides quality control for AMAC training materials and e-text production.
Patrick Fraser
Grants & Operations Manager

Patrick has worked in a variety of capacities at AMAC over the last seven years. In addition to leading all of AMAC’s grant writing and research administration, Patrick is also a trained C-Print captionist and a seasoned audio describer. Patrick previously coordinated services for AMAC’s Captioning and Described Media Unit.
AMAC Accessibility Solutions

• AMAC Accessibility is a social change organization on a mission to create affordable services for governmental, private and non-profits organization working with individuals with disabilities. Services include e-text, braille, captioning, assistive technology, office management software and consulting.
AMAC creates practical solutions that work, with a focus on utility, ease of use, and high quality.

- **Accessibility Consulting** focuses on organizational accessibility needs with evaluation, technical assistance, customer support, and website accessibility solutions.

- **Braille Services** produces customized projects from both print materials and electronic text including partial books and chapters, or graphics only, using cutting-edge technology.

- **Captioning Services** makes classrooms, meetings, labs, and other audio environments fully accessible for the deaf or hard-of-hearing.

- For more information, please visit our website at www.amacusg.org
AMAC creates practical solutions that work, with a focus on utility, ease of use, and high quality.

- **Audio Description Services** makes visual information present in multimedia accessible to persons who are blind or low vision.
- **Professional E-Text Producers** provide high-quality e-text in many formats such as PDF, DOC, DAISY, and HTML.
- **AMAC’s Certified Assistive Technology team** provides on-site and remote assessments, demonstrations, training, and technical assistance for education, work, and daily living environments.

For more information, please visit our website at www.amacusg.org
We’re here to help Georgians with disabilities gain access to and acquisition of assistive technology devices and assistive technology services so they can live, learn, work, and play independently in the communities of their choice.
You can find helpful ‘508 Checklists’ for various file types on the U.S. Department of Health and Human Services website:
## Considerations

### Check Master Requirements

<table>
<thead>
<tr>
<th>ID</th>
<th>1.0. Master Requirements for all Documents</th>
<th>Yes (Pass)</th>
<th>No (Fail)</th>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Does the document file name not contain spaces and/or special characters?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.2</td>
<td>Is the document file name concise, generally limited to 20-30 characters, and makes the contents of the file clear in the context in which it is presented?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.3</td>
<td>Does the document utilize recommended fonts (i.e., Times New Roman, Verdana, Arial, Tahoma, Helvetica, or Calibri)?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.4</td>
<td>Does the document refrain from using flashing/flickering text and/or animated text?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.5</td>
<td>Do all URLs contain the correct hyperlink and display the fully qualified URL (i.e., <a href="http://www.samhsa.gov">http://www.samhsa.gov</a> and not <a href="http://www.samhsa.gov">www.samhsa.gov</a>)?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.6</td>
<td>Are all URLs linked to correct Web destinations?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.7</td>
<td>Are e-mail links accessible?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1.8</td>
<td>Has a separate accessible version of the multimedia file been provided when there is no other way to make the content accessible?</td>
<td></td>
<td></td>
<td></td>

508 accessible files checklists
Check Functional Control Requirements

508 accessible files checklists
Audio description, also known as video description or visual description, is an additional narration track intended primarily for consumers of visual media (including television and film, dance, opera, and visual art).

It consists of a narrator talking through the presentation, describing what is happening on the screen or stage during the natural pauses.
Examples: Audio Description Icons
What is Closed Captioning?

• **Closed captioning (CC)** is a process of displaying text on a television, video screen, or other visual display to provide additional or interpretive information.

• **Closed captioning** is typically used as a transcription of the audio portion of a program as it occurs (either verbatim or in edited form), sometimes including descriptions of non-speech elements.
What is Open Captioning?

- "Open", "burned-in", "baked on", or "hard-coded" captions are visible to all viewers.

- The term "closed" versus "open" indicates that the captions are not visible until activated by the viewer, usually via the remote control or menu option.
Examples: Captioning Icons
Technology and the Law

• Ubiquity of the Internet

• Proliferation of Tablets and Smartphones

• Essential Services Available Online

• Greater Awareness of People with Disabilities
• 25 Year Anniversary
• Became Law Prior to Birth of the Internet
• Designed to protect individuals against discrimination on the basis of disability
• The Significance of Title III of the ADA:
  – What does “Places of Public Accommodation” mean?
Lawsuit Filed Against Harvard and MIT

- National Association of the Deaf Files Class Action Lawsuit Against Harvard and MIT
  – February, 2015

- Denying People who are deaf and hard of hearing access to thousands of videos and audio recordings
  – MOOC Offerings
DOJ: Slow Bureaucrats or Accessibility Champions?

• High Profile Settlements

• Accessibility Requirements
  – WCAG 2.0 (Level AA) Applied
  – Web Accessibility, which includes captioning
  – Mobile Accessibility
  – Appoint Web Accessibility Coordinator
  – Adopt Web Accessibility Policy
DOJ Settlement with edX

• edX, Provider of Massive Open Online Courses
• Settlement Reached April 2\textsuperscript{nd}, 2015
• Four Year Agreement Requires:
  – Website, Mobile Apps, LMS Accessible within 18 months
  – Provide Guidance to Course Creators to make courses accessible
  – Appoint Web Accessibility Coordinator
  – Adopt Web Accessibility Policy
  – Web Accessibility Training Provided to Employees
  – Retain Consultant to Evaluate Conformance
Section 508 Requirements

• 1998 Amendment to the United States Workforce Rehabilitation Act of 1973, a federal law mandating that all electronic and information technology developed, procured, maintained, or used by the federal government be accessible to people with disabilities.

• Specific Requirements for Video Equivalents Under Section 508
  – Video or Multimedia Products (1194.24)
Section 255

- Requires telecommunications products and services to be accessible for people with disabilities
- Required if it is “readily achievable," meaning easily accomplishable, without much difficulty or expense
- If not “readily achievable,” they must design products to be compatible with adaptive equipment used by people with disabilities
CVAA

• Twenty-First Century Communications and Video Accessibility Act – signed into Law Oct. 8, 2010
• Updates federal communications law to increase the access of persons with disabilities to modern communications
• Title I: addresses communications access to make products and services using Broadband fully accessible to people with disabilities
• Title II: Makes it easier for people with disabilities to view video programming on television and the Internet
WCAG 2.0

• Level A, AA, and AAA

• Captions:
  – SC 1.2.2

• Audio Description or Media Alternative for Synchronized Multimedia:
  – SC 1.2.3
Section 508 Refresh (ICT Refresh)

• United States Access Board Updating ICT Covered by Section 508 and Section 255
• Harmonization of Standards with WCAG 2.0
• Proposed Rule released Feb. 18, 2015 that includes:
  – Computer Hardware/Software
  – Websites
  – Multimedia
Why bother with captioning?

• FCC Requirements
• Americans with Disabilities Act (ADA)
• Individuals with Disabilities Education Act (IDEA)
• It benefits those with different learning styles (visual learners).
• It’s helpful in learning a second language.

Hello World
Captioning 101

Why bother with captioning?

• Increase your reach! Captions ensure your videos are indexed by search engines more effectively.

• Increase usability for everyone.

• Enable access to audio information in loud settings.

• Promote literacy!

• We have an aging population.
Captioning 101

• Real-Time Captioning versus Captioned Media
• Open versus closed captions: What should I create, and why?
• Verbatim (Communication Access Real-time Translation) versus Meaning for Meaning Real-Time Captioning
• Captions versus Subtitles 😊
Closed Captioning

• CC is embedded either in the metadata on high definition (HD) or on line 21 of standard definition (SD). It is then decoded by the viewers’ television or set top box to be visible as necessary.

• The standard is known as ‘CEA’ or ‘EIA-608’.

• A decoder to read and an encoder to write.
Automated?

• A caption file is read from the media. They are not added as the program is broadcast. The caption file may be embedded or require third party or in-house production of the caption file prior to broadcast. The caption file can be uploaded to the web as well. (YouTube)

Re-voicing/Voice recognition/Re-speaking

• Typically only used in live captioning.
Automated Captions

• YouTube automated captions versus edited captions:  
  https://support.google.com/youtube/answer/2734796?hl=en

• The process can take time, but it is worth the effort.
Closed Captioning: Quality Matters

Automated Captions: Human Eyes Need to Review

3. “That’s your special friend butterfly who came to say ‘hello’ to you”

What YouTube heard:
Closed Captioning Tips: Quality Matters

Creating Transcripts: Transcribe the audio.

• Manually: Express Scribe software, foot pedals
• Using Voice Recognition Software:
  Dragon Naturally Speaking: Train the software!
  Windows and Mac voice recognition technology
• Proofread and edit (new eyes!)
• The Associated Press (AP) Stylebook
Captioning Tips: Use Plain Language

• Nearly 50% of US adults read at the 7th grade reading level.

• Create accessible, inclusive content from the start.

Captioning Tips: A Word about Language

• Use common words. If you must use unfamiliar words, define them for the reader.

• Avoid confusing words and phrases.

• Avoid or explain acronyms, jargon, and idioms.
Captioning Tips: Words in Plain Language

Common Words /Phrases
> It is often the case that
> As a consequence of
> During the time that
> In close proximity

Plain Language
> Often
> Because
> While
> Near
Captioning Guidelines

• See the DCMP’s Captioning Key for detailed info.
• Spelling, punctuation, synchronization, placement, two lines, proper line breaks, etc.
• Speaker identification, use of italics, proper use of slang, important sound effects, contrast
• Captioned Media versus Transcripts (Context matters!)
• Plan ahead!
Captioned Media: Resources and Training

• Training, hands-on practice, and then more training...

• [www.DCMP.org](http://www.DCMP.org) (DCMP “approved” captions)

• MAPGpie (Media Access Generator) (Windows only right now) (Free software)
  – National Center for Accessible Media
  – Works with audio description, too!
  – Additional software available
Availability on TV

1. Regulatory Requirements
   – Highly variable with issues of quality control
   – CC standards, AD Best Practices

2. Cost
   – CC low, AD high

3. Technology
   – Broadcasting technical support system
   – User interface accessibility (Set-top box/remote)
Availability over the Web

1. Regulatory Requirements
   – None

2. Cost
   – CC low, AD high

3. Technology
   – CC straightforward, AD very technically difficult
   – User interface accessibility (Accessible Media Player)
Audio Description Basics

• Audio Description: Live or on media/videos
• Audio Description is a narrated description of visual content (costumes, scene changes, settings, and/or other important visual content like body language)
• Sounds come through the SAP channel (the secondary audio track) (Turn on or off)
• High quality recordings and audio mixing abilities needed.
• Simple versus complex: Audio Description often requires extensive research.
Audio Description Basics

- *The Visual Made Verbal*, Dr. Joel Snyder
- Skills of good audio describers:
  - Concentration, eye for detail, vocabulary, objectivity, sense of timing.
  - AND technology skills
- An emerging science and art
- Inclusion and UDL
Audio Description: Resources and Training

• AMAC’s audio description demo (Show video): *National Geographic, Jules and Jim* clips
• Audio description in the news: *Daredevil* series on Netflix with audio description.
• Audio description as a science and an art
• Use vivid, succinct language at natural pauses.
• Draft a script, and have it proofed (new eyes!)
• Again, do your research!
• Pre-show notes (braille options)
Audio Description: Resources and Training

• Training, hands-on practice, and then more training...

• American Council of the Blind’s Audio Description Project: [http://www.acb.org/adp/](http://www.acb.org/adp/)

• The Audio Description Coalition: [http://www.audiodescriptioncoalition.org/index.html](http://www.audiodescriptioncoalition.org/index.html)

• The Kennedy Center’s Leadership Exchange in Arts and Disability (LEAD): [http://www.kennedy-center.org/accessibility/education/lead/](http://www.kennedy-center.org/accessibility/education/lead/)
Tips: Creating Accessible Content

- When is Audio Description Needed/Can I find an alternative?
- Utilize inclusive presentation planning best practices.
- Have the presenter describe what is going on in the video.
- Use descriptive language to describe visual information.
- Leave out the “As you can see here,” etc.
- Use precise language.
